

"Your LSO timetable. Solved."

The question every coordinator asks on Monday morning

Which LSO is free period 3? Who is covering for today's absence? Which students missed support this week and does that affect our NCCD acquittal? For leadership: is our LSO investment reaching the students who need it most, and do we have the evidence for census? Allocateiq answers all of these from the same system you use to build the timetable. No spreadsheet. No phone call chain. No manual evidence reconstruction at year end.

Before and after

Before Allocateiq	After Allocateiq
Timetable built in a spreadsheet. Rebuilt from scratch each term.	Term carries forward automatically. New Term wizard: five steps, five minutes.
LSO absence managed by phone calls and WhatsApp. Affected classes discovered late.	Today view shows live deployment. Absence flagged and affected classes highlighted immediately.
NCCD evidence reconstructed from emails and timetables at census time.	Evidence accumulates as a byproduct of normal use. Excel export ready for census.
Leadership asks for a coverage report. Coordinator builds one manually.	Analytics dashboard shows LSO load, coverage, NCCD category breakdown. One view.

Three people. One system. All the answers.

□ LSO Coordinator	□ Principal / Business Manager	□ LSOs
Replaces hours of weekly spreadsheet work. Timetable always current. Absence handled without a phone chain. Term-end export goes straight to the NCCD submission.	NCCD compliance evidence collected automatically. Analytics show whether LSO hours reach the students who need them most. Acquittal tool links student load to wages and funding for census.	QR code on their phone shows today's schedule. No paper briefing notes. No confusion about room changes or covered absences.

What Allocateiq does

Timetable grid	Drag-and-drop assignment across the full term. Clash detection flags conflicts as you assign.
Today view	Live daily deployment. Absence flagging updates affected classes instantly.
NCCD evidence	LSO assignments linked to students, NCCD category, and program automatically.
Analytics	LSO period load, workload equity, program coverage, NCCD breakdown. One dashboard.
New Term wizard	Five steps to carry forward, update bell times, and open for assignment.
Excel export	3-sheet NCCD workbook: student summary, weekly assignments, LSO hours with verification method.
LSO mobile view	Staff scan a QR code to see their day's schedule on a phone. No paper required.

Multi-coordinator

Large and Enterprise tiers support multiple coordinators with role-based access.

Annual pricing · per school · no per-LSO charges

Tier	Enrolment	Price (ex GST)	Included
Pilot	Term 2 2026	Free	Full access, direct support, preferred pricing at launch.
Standard	Any school	\$1,800/yr	Full timetable, today view, NCCD Excel export, new term wizard.
Large	500+ students	\$2,800/yr	Everything in Standard plus multi-coordinator and LSO mobile view.
Enterprise	Multi-campus	\$4,200/yr	Everything in Large plus multi-campus, SSO, custom onboarding.

All prices AUD, exclude GST. Bundle with Writeiq saves approximately 25%.
