

1

Open the app on your device

Go to: edsthetic.com/apps/writeiq/

Use any browser on a laptop, tablet, or phone. You do not need to install anything.

Tap or click: Enter class code

2

Enter the class code

Your teacher has written the code on the board.

Type it exactly. It is not case-sensitive.

Press Enter or click Continue

3

Read the prompt and start writing

The writing prompt appears on your screen when you enter the code.

Write in the text box. Do not copy from the internet or another student.

Your work is saved as you type — do not refresh the page

4

Click Submit when you are finished

This is the most important step.

Do not close the tab or refresh the page before submitting — your work will be lost.

Your teacher cannot submit for you — you must click the Submit button yourself

5

Read your feedback

Your results appear immediately after you submit.

You will see your band, scores for each criterion, and one specific next step.

Your teacher can also see your results in the class view

If something goes wrong: raise your hand. Do not refresh or close the tab.
